

One dashboard. Every channel. Actionable insight for corporate and executive communications.

Pfizer Digital Analytics gives communications teams a unified view of corporate and executive social performance — plus Wikipedia visibility that shapes search results. Live data pulls, post-level scoring, narrative arc tracking, and leadership-ready reporting without spreadsheets or manual channel exports.

THREE INTEGRATED MODULES

01 Corporate Social Analytics

All-channels rollup · cross-platform KPIs

Rolls up Pfizer corporate performance — followers, posts, engagement, reach, and impressions across every major platform in one view.

- Channel KPIs and story-beat breakdowns
- Organic vs. paid split (when connected)
- Top performers and underperformers by post

02 CEO Social Analytics

Albert Bourla · LinkedIn & X

Same scoring engine, tuned for executive communications — tracking the CEO's personal LinkedIn and X presence alongside corporate channels.

- Executive post deep dives with voice analysis
- Engagement, narrative role, and recommendations
- Weekly, monthly, and quarterly executive reports

03 Wikipedia Analytics

Corporate article · CEO profile

Monitors article health and search visibility — critical because Wikipedia often ranks first when investors, journalists, or employees search for Pfizer or its leadership.

- Daily pageview trends and maintenance flags
- Editor's review with editorial recommendations
- Separate views for corporate and CEO articles

PER-POST QUALITATIVE ANALYSIS

WHAT WORKED

Explains why content landed — story beats, format, and engagement drivers to double down on.

IMPROVEMENTS

Flags what's holding engagement back, with specific suggested changes for the next post.

NARRATIVE ROLE

Shows where each post fits in Pfizer's corporate story arc and executive voice strategy.

Recommendations translate directly into digital strategy updates and quarterly planning — not just metrics, but why posts succeed or stall.

REPORTING CADENCE

Weekly

Week-over-week comparison and narrative arc — see whether Pfizer is building story momentum or publishing in isolation.

Monthly

Post performance rolled up across every channel with month-over-month comparison and top-performer identification.

Quarterly

Executive one-pager with strategic recommendations on content mix, paid support, and competitor gaps for leadership planning.

Wikipedia strategy note

Wikipedia is an open-source platform — it cannot be updated or edited by Pfizer directly. Changes must come from the volunteer community that runs Wikipedia. Vibe Code Flow helps interpret pageview signals, maintenance flags, and editorial recommendations — and plan the right community engagement strategy for both corporate and executive articles.

- Corporate Pfizer article — search visibility & article health
- Albert Bourla CEO profile — executive search results
- Open issues and maintenance flags surfaced automatically
- Contact Vibe Code Flow for Wikipedia strategy and advice
